MONTHLY REVIEW OF BUSINESS STATISTICS

Vol. XX

 $\frac{32}{32}$

OTTAWA, SEPTEMBER, 1945

No. 9

Dominion Statistician: S. A. Cudmore, M. A. (Okon.), L.L.D. (Tor.) F.S.S., F.R.S.C. Chief, Business Statistics Branch: Sydney B. Smith, M.A.

ECONOMIC CONDITIONS IN AUGUST

The factors indicating the trend of economic conditions averaged lower in August than in the preceding month. Five of the six prominent factors reached lower levels, the deposit liabilities of the chartered banks showing an important decline. The drop in Dominion balances more than offset the advances in other accounts. Speculative factors, including the prices of common stocks and the volume of trading on the Stock Exchanges, showed recession from the high level of July. Minor decline was shown in the general level of wholesale prices. The index of the physical volume of business was not greatly altered from the standing of July. The trend has been downward from the early months of 1944. The standing in July, on the base of 1935-1939, was 213.7.

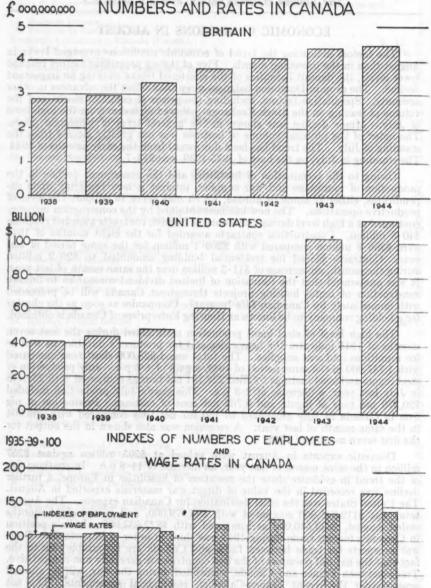

Owing to the termination of hostilities and the consequent decline in the production of munitions and war supplies, interest is now centering upon expenditures, either at home or abroad, which may serve to support the level of productive operations. The new business obtained by the construction industry continued at a high level during the month of August, contracts awarded reaching \$40.5 million. Construction contracts awarded for the eight months of 1945 were \$266.8 million compared with \$209.1 million for the same period of last year. Contracts placed for residential building amounted to \$20.2 million during the month, an increase of \$11.3 million over the same month of last year. It was announced that the formation of limited dividend companies to finance construction of rental housing projects throughout Canada will be proceeded with immediately by Canadian Life Insurance Companies as soon as the charter for a holding company to be known as Housing Enterprises of Canada is obtained.

The high level of steel ingot production maintained during the first seven months of 1945 indicates the heavy demand for producer's durables as well as for munitions and war supplies. The total was 1,825,000 short tons compared with 1,747,000 in the same period of 1944, a gain of 4.5 p.c. July production of steel ingots and steel castings totalled 229,161 net tons as compared with 234,418 in July last year, a decrease of 2.3 p.c. This year's July production included 220,379 net tons of ingots and 8,762 net tons of castings. Production of pig iron in Canada in July amounted to 150,367 net tons compared with 166,004 in the same month of last year. A recession was also shown in the output for the first seven months of 1945.

Domestic exports in August were valued at \$295 million against \$257 million in the same month of last year, an increase of 14.8 p.c. In continuation of the trend in evidence since the cessation of hostilities in Europe, a further decline was recorded in the value of direct war materials exported in August. The United States was the chief destination for Canadian exports. The August total was \$112,645,000 compared with \$85,979,000, and in the eight months ended August, \$833,540,000 as compared with \$822,533,000. India's position in Canada's foreign trade during 1944 was third in order of importance. Postwar prospects for trade between India and Canada are favourable due to the fact that the natural resources of the two countries are generally non-competitive. Trade between France and Canada, suspended during the war, will be allowed again under the recent Franco-Canadian commercial agreements. The net flow of capital into Canada during June reached the high level of \$35.1 million

43673-2

WAGES AND SALARIES PAID IN BRITAIN AND UNITED STATES NUMBERS AND RATES IN CANADA

compared with net security sales of \$18.9 million in May and \$14.1 million in April. For the first six months of the present year, sales amounted to \$197.9 million compared with \$113.4 million in the first half of 1944, while the purchases totalled \$98.9 million as compared with \$53.6 million.

The high level of retail trading was continued in July according to indexes of sales computed from returns received from a sample number of firms representing 14 different retail trades. July sales, while receding seasonally from the June figure, stood 10 p.c. higher than the dollar volume of business transacted in July a year ago. Various factors may be quoted as contributing to the high level of retail trading but what contribution each factor has made to the general result it is impossible to gauge. The return of service personnel from overseas and their re-establishment in civilian life, population shifts from some war production and military centres to other areas, continued improvement in the supply situation together with the continued high level of purchasing power may all be quoted as stimulants to retail purchasing.

July wholesale trading advanced 14 p.c. over the dollar volume of business transacted in July of last year, according to statements received from approximately 415 wholesale establishments representing nine different lines of wholesale trading. All regions of the country reported increased sales but a somewhat smaller gain was recorded in the Prairie Provinces than in other parts of the country. Inventories in the hands of wholesalers averaged 2 p.c. higher than at the end of July, 1944. Country general store sales in Canada increased 7 p.c. in July of this year as compared with the same month of 1944. The conclusion was based on returns received from 717 stores handling a general line of merchandise and located in the smaller communities and rural areas.

Ordinary expenditures of the Dominion government showed an increase from \$271 million in the first five months of the past fiscal year to \$388 million in the same period of the present year War expenditures declined from \$1,282 million to \$854 million while special expenditures receded from \$1,633 million \$1,465 million.

The index of payrolls in nine leading groups on the base of June 1, 1941, was 143.9 on July 1 last compared with 147.0 as of July 1, 1944. The standing in the same week of 1943 was 144.3. The influence of the war has resulted in particularly marked expansion in employment and payrolls in factories, in which the rate of acceleration during the period of observation has been decidedly greater than in the non-manufacturing industries. Thus in spite of recent cut-backs, the index of employment in manufacturing at July 1 was 23.2 p.c. higher than at June 1, 1941, while the payrolls in the same period have advanced by 56.3 p.c., proportions decidedly exceeding those given for the eight leading In accordance with the trend indicated at July 1 in 24 of the preceding years since 1920, there was an increase in industrial activity at the beginning of July, 1945. The number then added to the working forces, however, was abnormally small, being less than one-tenth of the average gain at July 1 in the period, 1921 to 1944. This was due in part to an important contraseasonal recession in manufacturing as a result of curtailment in war production, and in part, to the fact that employment generally in the non-manufacturing industries, for various reasons, showed advances that were decidedly less than usual at the beginning of July.

Claims for unemployment insurance benefit filed in local offices throughout Canada in July totalled 10,886, almost identical with the number filed in June, but an increase over the 3,106 claims registered during July last year. A total of 18,257 persons received one or more benefit payments during July compared with 16,921 in June and 4,753 in July last year.

According to unofficial sources, the payment of dividends during the first eight months of the year were not greatly altered from the standing in the same

and decident 1-112 hope wall. I. Analytical and General segrences has drive becomes

Marketings of wheat from farms in Western Canada amounted to 34·1 million bushels between August 1 and September 13 of the present year against 38·9 million in the same period of 1944. Stocks of Canadian wheat were 202·9 million bushels on September 13 against 295 million on the same date of last year. At September 4, grain shipments from the Lakehead to Eastern Canada amounted to about 307·6 million bushels. During 1944 about 463 million bushels, a new record, were moved by this route. Sales of livestock on stockyards were considerably less in August than in the preceding month, the index dropping from 144·4 to 128·6. Cattle sales were at a higher level while hogs showed a decline. The index of cold storage holdings was 141·5 in August against 155·6 in July.

The output of newsprint was at a considerably higher level in August, the total rising from 270,640 short tons to 287,028. Shipments from Canada in the first eight months of this year represented 75 p.c. of total United States supply compared with 60 p.c. in the same period of 1939. The gross value of the production of Canada's pulp and paper industry reached a new high level of \$369.8 million in 1944. The value was 7.4 p.c. greater than in 1943 when the previous record was achieved. The 77 mills making paper in 1944 produced 4,044,376 tons of paper and other products valued at \$255,545,841. Newsprint made up 75.2 p.c. of the total reported tonnage of paper manufactured last year.

Factors indicating the trend of mineral production in the latest available month were uneven. Gold receipts at the Mint rose from 193,834 fine ounces in July to 209,014 in the month under review. The flour milling industry was less active in the latest available month. The output of flour receded from 2,134,000 barrels to 1,822,000. The index of production in the meat packing industry rose from 142.4 in July to 149.1. The slaughtering of cattle and sheep showed advances while hogs were at a somewhat lower level. Dairy production, after seasonal adjustment, showed an increase in August, the index moving up two points to 129.5. Canned salmon exports were 4.4 million pounds against 1.5 million in July. The cotton textile industry was more active, the cotton used rising from 10.5 million pounds to 12.6 million.

The Canadian National Railways reported gross operating revenue for August at \$38.2 million. The amount was \$1.7 million less than the all-time record high in the previous month and was also \$132,000 less than in August last year. Operating expenditures for the month were reduced \$2.4 million to a total of \$30.1 million. Resultant net operating revenue in August this year totalled \$8.1 million compared with \$5.9 million a year ago, being an increase of \$2.2 million.

During the first eight months of this year gross revenue totalled \$291.9 million, an increase of \$1.5 million compared with the same period of last year. The net operating revenue was \$56.6 million, an increase of \$986,000 over \$55.6 million reported for last year.

The Canadian Pacific Railway reported gross earnings for the week ending September 14 at a total of \$6,369,000 compared with \$6,303,000 for the corresponding week of last year. The total gross earnings for the year up to September 14 were \$222.6 million compared with \$222.9 for the same period of 1944, being a decrease of \$247,000 or 0.1 p.c.

OTTAWA, SEPTEMBRE 1945

No 9

Statisticien du Dominion: S. A. Cudmore, M.A. (Oxon.), LL.D. (Tor.), F.S.S., F.R.S.C. Chep, Branche des Statistiques Économiques: Stonet B. Smyri, M.A.

SITUATION ÉCONOMIQUE EN AOÛT

Les facteurs traçant l'orientation de la situation économique en août sont en moyenne plus bas que le mois précédent. Cinq des six principaux facteurs laissent voir des reculs, les dépôts aux banques à charte accusant un déclin important. La diminution des soldes du Dominion fait plus que contre-balancer l'augmentation des autres catégories de dépôts. Les facteurs spéculatifs, comprenant le cours des actions ordinaires et le volume des transactions boursières, rétrogradent au regard du niveau élevé de juillet. Les prix de gros baissent un peu. L'indice du volume physique des affaires ne change pas beaucoup comparativement à juillet; il tend à décliner depuis les premiers mois de 1944. En juillet il se place à 213-7, sur la base de 1935-1939.

En raison de la cessation des hostilités et de la diminution de la production de munitions et de matériel de guerre qui a suivi, l'intérêt se concentre maintenant sur les dépenses, soit au pays, soit à l'étranger, qui peuvent aider à maintenir les opérations productives. Les nouvelles entreprises dans l'industrie de la construction continuent d'être considérables en août, les contrats adjugés atteignant \$40,500,000. Les contrats de construction accordés durant les huit premiers mois de 1945 se chiffrent par \$266,800,000, à rapprocher de \$209,100,000 la même période de l'an dernier. Les contrats de construction d'habitations s'établissent à \$20,200,000 en août, augmentation de \$11,300,000 comparativement au même mois de l'an dernier. Il a été annoncé que des compagnies canadiennes d'assurance-vie procéderaient à la formation de compagnies à dividendes limités pour financer des projets de construction de logements à louer dans tout le Canada, dès que serait obtenue la charte d'une société de portefeuille connue sous le nom de Housing Enterprises of Canada.

La production d'acier en lingots, qui s'est maintenue à un niveau élevé au cours des sept premiers mois de 1945, indique que la demande d'articles de production, de munitions et de matériel de guerre est forte. La production est de 1,825,000 tonnes courtes contre 1,747,000 la même période de 1944, augmentation de 4·5 p.e. La production de lingots et de pièces d'acier en juillet cette année se place à 229,161 tonnes nettes, comparativement à 234,418 en juillet l'an dernier, diminution de 2·3 p.c. La production de juillet cette année comprend 220,379 tonnes nettes de lingots et 8,762 tonnes nettes de pièces. La production canadienne de fonte en gueuse s'établit à 150,367 tonnes nettes en juillet, à rapprocher de 166,004 le même mois de l'an dernier; la production des sept premiers mois de 1945 accuse également une diminution.

Les exportations de produits canadiens ont une valeur de \$295,000,000 en août contre \$257,000,000 le même mois de l'an dernier, augmentation de 14·8 p.c. Conformément à la tendance observée depuis la cessation des hostilités en Europe, la valeur des exportations de matériel de guerre décline encore en août. Les Etats-Unis sont la principale destination des exportations canadiennes; le total est de \$112,645,000 en août cette année contre \$85,979,000 en août l'an dernier, et de \$833,540,000 les huit premiers mois de cette année comparativement à \$822,533,000 la même période de l'an dernier. En 1944, l'Inde a occupé le troisième rang dans le commerce extérieur du Canada. Les perspectives du commerce d'après-guerre entre le Canada et l'Inde sont favorables, puisque les ressources naturelles de ces deux pays ne se font pas généralement concurrence. Le commerce entre la France et le Canada, suspendu durant la guerre, sera permis de nouveau en vertu des récents accords com-

merciaux franco-canadiens. La rentrée nette de capitaux au Canada en juillet atteint la cime de \$35,100,000, comparativement à des ventes nettes de valeurs mobilières de \$18,900,000 en mai et \$14,100,000 en avril. Les ventes du premier semestre s'élèvent à \$197,900,000 contre \$113,400,000 la même période de 1944, tandis que les achats s'établissent à \$98,900,000 comparativement à \$53,600,000.

Le commerce de détail se maintient à un niveau élevé en juillet, selon les indices des ventes calculés d'après les rapports fournis par un nombre échantillon d'établissements représentant quatorze genres de commerce. Les ventes de juillet, bien qu'elles accusent une diminution saisonnière au regard de juin, augmentent de 10 p.c. comparativement à juillet l'an dernier. Plusieurs facteurs peuvent être mentionnés qui ont contribué à maintenir le commerce de détail à un niveau élevé, mais il est impossible d'établir la contribution de chaque facteur en particulier. Le retour d'outre-mer des membres des services de l'armée et leur rétablissement dans la vie vicile, les déménagements de la population de certains centres militaires et de production de guerre, l'amélioration continue de la situation des approvisionnements et le niveau élevé du pouvoir d'achat, voilà autant de facteurs qui ont stimulé le commerce de détail.

En juillet cette année le commerce de gros augmente de 14 p.c. au regard de juillet l'an dernier, d'après les rapports fournis par environ 415 établissements de gros représentant neuf genres de commerce. Toutes les régions du pays rapportent une augmentation des ventes, mais le gain dans les Provinces des Prairies est un peu plus faible que dans les autres parties du pays. Les stocks entre les mains des grossistes sont en moyenne de 2 p.c. plus considérables qu'à la fin de juillet 1944. Les ventes des magasins généraux ruraux au Canada augmentent de 7 p.c. en juillet cette année comparativement au même mois de 1944, d'après les rapports reçus de 717 magasins généraux situés dans les petites

localités et les régions rurales.

Les dépenses ordinaires du gouvernement fédéral augmentent de \$271,000,000 les cinq premiers mois de la dernière année financière à \$388,000,000 la même période de cette année. Les dépenses de guerre diminuent de \$1,282,000,000 à \$854,000,000, tandis que les dépenses spéciales passent de \$1,633,000,000 à

\$1,465,000,000.

L'indice des bordereaux de paye dans neuf principales industries se place à 143.9 le ler juillet (base 100 le ler juin 1941) contre 147.0 le ler juillet 1944 et 144.3 la même semaine de 1943. L'influence de la guerre a été particulièrement marquée sur l'emploiement et les bordereaux de paye dans les fabriques; le taux d'accélération pendant la période observée a été nettement plus grand que dans les industries non manufacturières. Aussi, malgré les récents reculs, l'indice de l'emploiement dans les manufactures le ler juillet excède de 23.2 p.c. celui du ler juin 1941, tandis que les bordereaux de paye pendant la même période augmentent de 56.3 p.c.; ce sont des proportions qui dépassent de beaucoup celles qui sont constatées dans les huit principales industries. Conformément à la tendance observée le ler juillet au cours de 24 des années précédentes depuis 1920, l'activité industrielle s'intensifie au début de juillet 1945. Toutefois, le nombre de personnes ajoutées aux effectifs est exceptionnellement faible, soit moins d'un vingtième du gain moyen le ler juillet de 1921 à 1944. Cette situation est attribuable en partie à une importante régression hors de saison dans l'industrie manufacturière, par suite de la diminution de la production de guerre, et en partie à ce que l'emploiement en général dans les industries non manufacturières, pour diverses raisons, a accusé des gains bien inférieurs à la normale au début de juillet.

Les réclamations de prestations d'assurance-chômage envoyées aux bureaux locaux dans tout le Canada se chiffrent par 10,886 en juillet, soit à peu près le même nombre qu'en juin, mais augmentation par rapport aux 3,106 réclamations inscrites en juillet l'an dernier. En juillet cette année 18,257 personnes reçoivent un ou plusieurs paiements de prestation contre 16,921 en juin et 4,753 en juillet

l'an dernier.

D'après des sources officieuses, les paiements de dividendes au cours des huit premiers mois de l'année n'offrent pas beaucoup de changement comparativement à la même période de 1944. Le gouvernement fédéral verse \$25,400,000 en intérêts en juillet cette année contre \$31,500,000 le même mois de l'an dernier.

Production-

10

Les cultivateurs de l'Ouest canadien livrent 34,100,000 boisseaux de blé du ler août au 13 septembre, à rapprocher de 38,900,000 la même période de la campagne de 1944. Les stocks de blé canadien se placent à 202,900,000 boisseaux le 13 septembre contre 295,000,000 la même date de l'an dernier. Les expéditions de grain de la tête des Lacs à l'Est canadien s'élevaient à 307,600,000 boisseaux le 4 septembre. En 1944, les expéditions par cette route se sont placées à 463,000,000 de boisseaux et ont établi un nouveau record. En août les ventes de bestiaux aux enclos sont beaucoup moins considérables que le mois précédent, l'indice déclinant de 144.4 à 128.6. Les ventes de bêtes à cornes augmentent, alors que celles de porcs diminuent. L'indice des stocks dans les entrepôts frigorifiques s'établit à 141.5 en août comparativement à 155.6 en juillet.

La production de papier à journal est beaucoup plus considérable en aoûts soit 270,640 tonnes courtes contre 287,028. Les expéditions du Canada durant les huit premiers mois de cette année représentent 75 p.c. des approvisionnements des Etats-Unis comparativement à 60 p.c. la même période de 1939. La valeur brute de la production canadienne de pulpe et de papier atteint le sommet de \$369,800,000 en 1944, soit 7.4 p.c. de plus que le record antérieur de 1943. Les 77 papeteries canadiennes produisent 4,044,376 tonnes de papier et autres produits d'une valeur de \$255,545,841 en 1944. Le papier à journal représente 75.2 p.c. du volume total de la production papetière l'an dernier.

Les facteurs traçant l'orientation de la production minérale sont diversifiés le dernier mois dont les statistiques sont connues. Les arrivages d'or à la Monnaie augmentent à 209,014 onces fines en août contre 193,834 en juillet. La minoterie est moins active le dernier mois connu. La production de farine diminue de 2,134,000 barils à 1,822,000. L'indice de la production de la salaison passe de 142·4 en juillet à 149·1 en août. Les abatages de bêtes à cornes et de moutons augmentent, tandis que ceux de porcs diminuent un peu. La production laitière augmente en août après ajustement pour la saison; l'indice gagne deux points et se place à 129·5. Les exportations de saumon en boîte s'élèvent à 4,400,000 livres contre 1,500,000 en juillet. L'industrie textile du coton est plus active, la consommation de coton augmentant de 10,500,000 livres à 12,600,000.

Les recettes brutes des Chemins de fer Nationaux du Canada se chiffrent par \$38,200,000 en août, soit \$1,700,000 de moins que le record établi le mois précédent et \$132,000 de moins qu'en août l'an dernier. Les dépenses d'exploitation pour le mois diminuent de \$2,400,000 et se placent à \$30,100,000. Les recettes nettes en août cette année sont de \$8,100,000 contre \$5,900,000 il y a un an, augmentation de \$2,200,000. Durant les huit premiers mois de cette année les recettes brutes atteignent un total de \$291,900,000, augmentation de \$1,500,000 sur la même période de l'an dernier. Les recettes nettes d'exploitation s'établissent à \$56,600,000, augmentation de \$986,000 comparativement à celles de \$55,600,000 l'an dernier.

Les recettes brutes du chemin de fer Pacifique Canadien s'établissent à \$6,369,000 la semaine terminée le 14 septembre, à rapprocher de \$6,303,000 la semaine correspondante de l'an dernier. A venir jusqu'au 14 septembre les recettes brutes s'élèvent à \$222,600,000, au regard de \$222,900,000 la même période de 1944, diminution de \$247,000 ou de 0·1 p.c.
